

Practical 1 Introduction to Android and UI

Starting a New Project:

1. Start a new Android Studio project
2. Choose an “Empty Views Activity” as your template
3. Name the project as “Practical1”
4. Rename the package name to be as such “my.edu.utar.practical1”
5. Choose “Java” as the programming language and API 26 as Minimum SDK
6. Choose “Kotlin DSL (build.gradle)” as build configuration language
7. Click “Finish”

Exercises:

1. Display “Hello World”
2. Prompt for a name, allow the user to choose multiple choices among some options, allow the user to choose a single choice among another set of options and allow the user to click on “Submit” button
